

Policy Statement:

Many students attending school need medication to control a health condition. It is necessary that teachers (as part of their duty of care) assist students, where appropriate to take their medication. The school will ensure the students privacy and confidentiality and will exercise sensitivity towards this issue to avoid any stigmatisation.

Guidelines:

The student's parent/carer may wish to supply medication to be administered at the school. To minimise the quantity of medication held at the school, it should be considered if the medication can be taken outside of the school day, for example medication required three times a day may be able to be taken before and after school, and before bed.

Students will generally need supervision of their medication and other aspects of health care management. The school in consultation with parents/carers and the student's medical/health practitioner may consider the age and circumstances by which the student could be permitted to self-administer their medication, however this may only occur in very rare circumstance.

All medications, including prescription as well as non-prescription medication, including analgesics, such as paracetamol and aspirin and other medications which can be purchased over the counter without a prescription, are to be administered by school personnel only with permission of the parent or guardian. In order to ensure that the interests of staff, students and parents/guardians/approved persons are not compromised, medication will only be administered with explicit written permission from parent/guardian/approved person, or in the case of an emergency, with permission of a medical practitioner.

When administering prescription medication on behalf of parent/carers, the written advice received must be supported by specific written instructions on the original medication bottle or container, such as that on the pharmacists label noting the name of the student, dosage and time to be administered. Analgesics can mask signs and symptoms of serious illness or injury and will not, therefore, be administered by the school, as a standard first aid strategy. Therefore analgesics such as aspirin and paracetamol will not be stored in the school's first aid kit.

Evaluation:

This policy will be reviewed as part of the school's regular review cycle.
